

單位簡介

無縫橋接「園區醫院」與「研發中心」，共同建構完整生醫科技育成中心，整合資源推動學研成果商品化及衍生新創事業，強化生技產業經濟效益。培育產業以「高階醫材」為主、「新藥研發」為輔，吸引優質廠商進駐。短期內以「ICT醫材」、「藥物傳輸」為招商重點。

培育領域：高階醫材、新藥研發、ICT醫材、藥物傳輸

Seamlessly linking the Hsinchu Biomedical Science Park Hospital and the R&D Center will help to create a comprehensive Biomedical Science Incubation Center. The integration of resources will promote the commercialization of research achievements by the academic and research communities, as well as spin-offs and start-ups, thereby enhancing the economic benefits of the biotechnology industry. The main focus will be to cultivate the high-end medical devices industry, with emphasis also to be placed on the

development of new pharmaceuticals. Top-notch companies will be enticed to establish a presence in the center. In the short-term, recruitment efforts will be centered on firms dedicated to developing medical devices that utilize Taiwan's strengths in ICT, as well as firms focusing on drug delivery.
