# 連結在地 飛躍國際 展現創育產業新活力

根據2017年中小企業白皮書資料顯示，2016年臺灣中小企業家數為140萬8,313家，占全體企業97.73%；中小企業就業人數達881萬人，占全國就業人數78.19%，兩者皆創下近年來最高紀錄；中小企業銷售額11兆7,647億元，占全體企業30.71%，顯示中小企業無論在推升經濟回溫、創造就業機會上，皆扮演舉足輕重角色。正值政府全力推動新南向，經濟部中小企業處將協助臺灣中小企業掌握機會，借力海外新創環境，放眼海外市場，發揮樂觀創業精神，帶領臺灣經濟向前行。

本處自1997年開始推動育成政策，至今已累積豐碩成果。歷年來曾獲本處補助創育機構共計130所，累計補助33.959億元，並培育超過1.5萬家中小企業，維持及新增30萬個以上的就業機會、誘發投資金額超過1,480億元，並已協助116家企業成功上市(櫃)。

從國際經驗來看，支援新創企業發展並非侷限於單一環節，而是結合多元支援活動，形成創育產業生態，透過充分結合各產業資源，鏈結既有產業加速跨界跨域創新，形成良性循環。為型塑創育產業，以完善台灣整體創新創業環境，推動國內育成中心轉型，使其成為未來國內育成產業的支柱與領航者。因此，本處自107年起規劃中小企業創育機構發展計畫，透過將傳統育成中心的培育資源轉型為新創事業共享與支援組織體系，規劃以發展育成產業為核心，加強與民間加速器及募資平台

合作，以協助新創事業快速打入市場，期望創造一個以創新創業為核心，並充分結合各產業能耐的創育生態體系。本處將持續透過一連串輔導措施，促進創育服務特色化，將創育機構分為國際創育加速器(ISA)(含主題式國際創育加速器(FISA))、技術創業放大器(TEA)、在地產業創生機構(ICN)等類型，引領創育機構依自身能量，進而聚焦培育領域，邁向特色化、專業化及國際化，期因此形塑優質創新創業育成輔導生態，同心協力匯聚資源打造創新台灣。

未來本處將從「連結在地、連結國際、連結未來」的三大基礎出發，朝五大方向推進，包括：瞭解產業發展邏輯與需求，帶動產業生態鏈健全發展；結合重點產業創新及技術發展政策，加速新創育成；提升中小企業財務風險承擔能力以降低風險；配合國際供應鏈擴張以提供中小企業海外成長新機；同時啟動中小企業發展條例修法，為台灣中小企業升級發展打基礎。

面對全球經貿變化，中小企業是帶動臺灣經濟發展的引擎，亦是實踐國民幸福生活的載具，未來中小企業處將持續與中小企業一同共創、共生、共榮，並將運用「數位經濟」、「循環經濟」、「體驗經濟」三大驅動力，協助發展不同產業別的中小企業提升競爭力，一起努力打造「創新、就業、分配」的經濟發展新模式。

## Local Connections, for a Global Leap, Showing New Energy of Incubation Industry

According to the white paper on Small and Medium Enterprises in Taiwan 2017, there were 1,408,313 SMEs in 2016, accounting for 97.73% of all enterprises in Taiwan. SMEs employ 8.81 million people or 78.19% of the labor force employed, both reaching new highs in recent years. The sales revenue of SMEs was NT\$11.7647 trillion, accounting for 30.71% of all enterprises. This shows that SMEs play an important role in driving economic recovery and creating employment opportunities. The government is exerting every effort in promoting the New Southbound Policy. The Small and Medium Enterprise Administration (SMEA) of the Ministry of Economic Affairs will help SMEs in Taiwan seize this opportunity to expand overseas, and show their optimism and entrepreneurial spirit to lead Taiwan's economy forward.

The SMEA began implementing its incubation policy in 1997. Fruitful results have been yielded since then. Over the years, 130 incubators received cumulative subsidies of NT\$3.3959 billion from the SMEA, and over 15,000 SMEs were incubated, sustaining and increasing over 300,000 job opportunities, including over NT\$148 billion incremental investment and assisting 116 enterprises in becoming Initial Public Offerings (IPO).

Observing the experience of other countries, support for startups is not limited to a single aspect, and rather forms the incubation industry ecosystem through variety of support activities. Through the integration of resources in various industries, industries are linked together to accelerate cross-disciplinary innovation and form a virtuous cycle. The transformation of domestic incubators to create an incubation industry and provide an ideal environment for innovation and startups in Taiwan will make them to be the pillar and leader of Taiwan's future incubation industry. Hence, the SMEA began planning the SME Incubator Development Program in 2018. The program will transform the traditional incubators into an organization for sharing and supporting startups. The core plan is to develop the incubation industry, and the SMEA will strengthen its collaboration with private accelerators and fund-raising platforms to help startups quickly enter the market. The SMEA hopes to create an incubation ecosystem that fully utilizes the capabilities of each industry with innovation and startups. The SMEA has formulated a series

of guidance measures, to promote incubation service features. The divide incubators into International Startup Accelerators (ISA), Technical Entrepreneurship Amplifier (TEA), and Industry Co-Creation Network (ICN); guiding incubators to focus on specific fields based on their own capabilities, so that they become a featured, professional, and international trial ground for the commercialization of domestic startups. The SMEA hopes to thereby create an excellent innovation and startup guidance ecosystem, which will pool its resources together for the development of an innovative Taiwan.

In the future, the SMEA will direct its efforts in five directions based on the foundation of "linking local industries, connecting global market, and paving a path to the future," including: comprehend the needs of industrial development, to drive the industrial ecosystem healthy. Accelerate the incubation of startups by combining innovation and technology development policies for key industries. Increase the financial risk taking ability of SMEs to lower their risks. Provide SMEs with new growth opportunities through the expansion of global supply chain. Set off legislative procedures for amending the Act for Development of Small and Medium Enterprises, laying the foundation for upgrading Taiwan's SMEs.

SMEs are the engine driving Taiwan's economy development in global economic changes. They are also vehicles carrying happiness to citizens. In the future, the SMEA will continue to co-create, co-exist, and mutually prosper with SMEs. The three driving forces, specifically digital economy, circular economy and experience economy, will be utilized to help SMEs in different industries enhance their competitiveness, and jointly create a new economic development model of "innovation, employment, and distribution."

**Areas of focus** | high-end medical devices ,development of new pharmaceuticals, medical devices in ICT,drug delivery

**Providing as a location for companies registry** | NO

**Introduction** | Seamlessly linking the Hsinchu Biomedical Science Park Hospital and the R&D Center will help to create a comprehensive Biomedical Science Incubation Center. The integration of resources will promote the commercialization of research achievements by the academic and research communities, as well as spin-offs and start-ups, thereby enhancing the economic benefits of the biotechnology industry. The main focus will be to cultivate the high-end medical devices industry, with emphasis also to be placed on the development of new pharmaceuticals. Top-notch companies will be enticed to establish a presence in the center. In the short-term, recruitment efforts will be centered on firms dedicated to developing medical devices that utilize Taiwan's strengths in ICT, as well as firms focusing on drug delivery.

**preference offering to clients** | No

**Incubation space** | Incubation space, meeting room.

**Special facility or equipment** | testing platform, 3D scanner, 3D printer
